<b>Office Action Summary</b>	<b>Application No.</b> 10/598,469	<b>Applicant(s)</b> NAKAMURA ET AL.	
	<b>Examiner</b> Minh Trinh	<b>Art Unit</b> 3729	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of species IB, claims 2-6, in the reply filed on 11/6/08 is acknowledged. Claims 1 and 7-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/6/08.

### ***Drawings***

2. Figures 9A-9C should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

3. Claims 4-6 are objected to under 37 CFR 1.75(c) as being in improper formats (note claims depend from nonelected claim i.e., claim 1). See MPEP § 608.01(n). Accordingly, the claims 4-6 have not been further treated on the merits

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear about the dependency of these claims. It is suggested that claims should be amend to depend on either claim 2 or 3.

“sheet like” (claim 3, line 3) renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Since a number of transition phrases recited in the claim (claims 2 and 3) it is not known as to where the body of the claim actually is? is it after the first comprising or the second consecutive comprising, please clarify.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wakana et al (JP 2002-329964) or Yasushi et al (2003-318535)

Wakana et al discloses a manufacturing method of a multilayer substrate comprising:

providing an positioning section 1 in a first wiring layer formed on at least a surface of the core section (see Fig. 1);

patterning a second wiring layer and/or any subsequent wiring layers using the positioning section in the first wiring layer as a reference (see Figs. 1-6).

Limitation of claim 3 is also met as the above discussion. (note: reference 1 or 10 represented the positioning section 1/10 being used to form wires pattern as in further figs 5-8, etc.

6. Claims 2-3 are also rejected under 35 U.S.C. 102(b) as being anticipated by Yasushi et al (2003-318535)

Yasushi et al discloses the method as claimed by the present invention including step of providing an positioning section 27 in a first wiring layer formed on at least a surface of the core section (see Fig. 1);

patterning a second wiring layer and/or any subsequent wiring layers using the positioning section in the first wiring layer as a reference (see various Figs. 1-4, and the discussion in light of abstract , lines 14, and solution 1-13, etc.).

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
